SOUND EQUIPMENT

YOU CAN NOW BUY SOME OF THE FINEST AND MOST EXPENSIVE SOUND SYSTEMS AT MUCH LESS THAN HALF THEIR ORIGINAL COST. SYSTEMS ARE AVAILABLE FOR THEATRES FROM 200 TO 2000 SEATS. THEY ARE COMPLETELY RECONDITIONED AND MODERNIZED.

RCA PG-59 TYPE OR WESTERN ELECTRIC TYPE CONSISTING OF:

- 2 - Soundheads, high fidelity type, with belt drives, pulleys, etc.
- 2 - 110 volt, AC, constant speed motors, with brackets, etc.
- 1 - High Fidelity type 25/30 watt amplifier, monitor speaker, etc.
- 2 - Heavy duty PM speakers, in baffles, etc.

For standard projectors, such as Simplex, etc.....\$395.00

RCA PG-105 SOUNDSYSTEM, FOR THEATRES UP TO 800 SEATS, CONSISTING OF:

- 2 - RCA Rotary stabilizer soundheads complete.
- 1 - Amplifier with monitor speaker, etc.
- 1 - Crossover Network.
- 1 - High Frequency speaker in high frequency type horn.
- 1 - Low Frequency speaker in low frequency type baffle.....\$775.00

SIMPLEX "E" SYSTEM, FOR THEATRES UP TO 800 SEATS, CONSISTING OF:

- 2 - Simplex SH-1000 Rotary stabilizer soundheads complete.
- 1 - Amplifier with monitor speaker
- 1 - Pre-amplifier
- 1 - High Frequency speaker in high frequency type horn.
- 1 - Low Frequency speaker in low frequency type baffle.....\$850.00

RCA PG-230, OR EQUAL, FOR THEATRES UP TO 1750 SEATS, CONSISTING OF:

- 2 - RCA MI-9030 or MI-9050 soundheads complete.
- 1 - Rack type amplifier with emergency amplification, monitor, etc.
- 1 - High Frequency speaker in high frequency type horn.
- 1 - Low Frequency speaker in low frequency type horn.....\$1350.00

Included in above systems are the fader switches, where necessary, exciter lamp supply, photocell cables, etc., ready to set up and operate. Many other makes and models available, all of which must be offered subject to stock on hand.

DEVRY

Proved
DEPENDABLE

The correctness of their design, their precision manufacture and their performance ability is best proved by the fact that DeVry has been awarded FIVE consecutive Army-Navy "E" Awards for Excellence in the Production of this model and similar motion picture projectors.

New—Simplified streamlined mechanism affords rapid, accurate threading and the utmost ease of operation.

The New DeVry

MODEL 2810 TRANSPORTABLE

**35MM. MOTION
PICTURE SOUND
PROJECTOR**

**With Built-in Sound Head and
1000 Watt Mazda Illumination**

In every detail this *New DeVry* reflects the unmatched experience of DeVry engineers who design professional motion picture equipment for Hollywood and better theatres throughout the world. Built to standards far in excess of those generally accepted for commercial use, this *New DeVry* reproduces brilliant, more uniformly illuminated, easier to see pictures, accompanied by sound that's true, natural and undistorted at every volume level. Buy the *New DeVry* and get everything on the film reproduced "Nature Real."

SPECIFICATIONS ON OTHER SIDE

**APPROVED BY
UNDERWRITERS' LABORATORIES**

FOR THEATRES • SCHOOLS • CHURCHES • INDUSTRY • CLUBS • BOARD ROOMS

Never before... Sensational!

a great sale

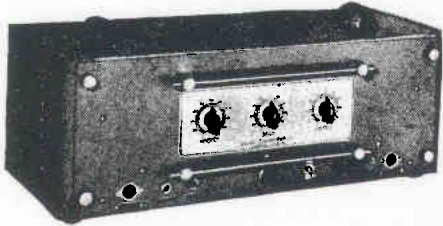

A fortunate large quantity purchase from the United States Navy enables us to offer these excellent projectors at a price far below the original cost. They are completely rebuilt, with a new grey crackle finish, renicked, and resemble new projectors in appearance.

Each outfit is complete, ready to set up and operate and consists of the following:

- 2 - DeVry 2810 (XD) projectors complete with 2000' magazines, lamphouse, plugs, cords, etc.
- 1 - Model 2804-A (ND) amplifier, 25 watt output, tubes, etc.
- 1 - Model 1100 speaker system.
- 2 - Lenses, in any focal length desired.

SPECIAL PRICE.....\$745.00

Factory list price was \$2295.00

**MODEL 2804-A
25 WATT AMPLIFIER**

(20 Watts at 2% Distortion)

Truly a deluxe portable amplifier housed in a modern, well ventilated steel cabinet. Flat response within 1 db from 50 to 10,000 cycles. Includes equalizers for balancing outputs for dual projection, separate wide range high and low frequency response controls.

**MODEL 1100.
SPEAKER SYSTEM**

(Right) A quality reproducer incorporating a high quality 12 inch permanent magnet speaker in a durable wood tuned, Karotol covered baffle. Includes 100 ft. heavy duty rubber covered speaker cable.

ESSENTIAL SPECIFICATIONS MODEL 2810 PROJECTOR

ILLUMINATION is provided by a 1000 watt Mazda lamp functioning in conjunction with a highly efficient optical system consisting of a reflector, condenser lenses and objective lens... combining to provide pictures that are more brilliant and more uniformly illuminated. Motor driven forced air cooling keeps lamphouse cool and assures full rated life of lamp.

PICTURE MECHANISM... a marvel of mechanical excellence. The intermittent movement, the "heart" of the projector is built to an accuracy of 1/10,000th inch and is perfectly synchronized with the efficient DeVry shutter mechanism. Sprockets are reversible, accurately machined and hardened. The sprocket idlers hold the film snug and safely in place on the sprocket. The film gate is removable as a unit and provides correct, equalized tension on the film in the gate for rock-steady projection. The aperture plate has a series of cooling baffles to protect the film from damage due to excessive heat.

BUILT-IN SOUND HEAD... truly an electronic masterpiece, combining the exciter lamp, photoelectric cell and sound optical lens in such an efficient manner that the sound is picked-up directly from the film—no mirrors or prisms to cause distortion due to dirty reflecting optical faces. Efficiently designed filtering system maintains constant film speed at point of scanning. The sound head not added to the mechanism, but is incorporated as an integral part of the projector—assuring perfect synchronization with the picture mechanism.

SILENT CHAIN DRIVE... exclusive with DeVry, provides velvet smooth, shock-proof noiseless power transmission. The ease, convenience and flexibility afforded by the silent chain drive in servicing has made this new DeVry one of the favorite choices of professional projectionists.

PLUS... 2000 ft. film capacity Film Magazine providing a full 22 minute show without changing reels... Exciter Supply Rectifier... Centralized Lubrication, Simplified Framing and Focusing Devices... Heavy sheet steel projector cases... heavy duty motor. **Guaranteed** by DeVry as to defect-free materials and workmanship. Any way you look at it... *Your best buy is a DeVry.*

NOTE: The Model 2810 Projector is Readily Convertible to Arc Lamp Operation.

MODEL 2810 PROJECTOR...

With Built-in Sound Head, 1000 Watt Mazda Lamp, Exciter Supply Rectifier, 2000 ft. Feed Magazine, 4" Projection Lens, 2000 ft. Film Reel, 10 ft. Power Cord (S798) and Photo Cell Cable (3091).

MODEL 2804-A AMPLIFIER with the MODEL 1100 SPEAKER.....

Amplifier complete with all Tubes and 10623 Power Cord. Speaker comes with 100 ft. heavy duty cable. For operation on 105-125 Volt, 50-60 Cycle ALTERNATING CURRENT.

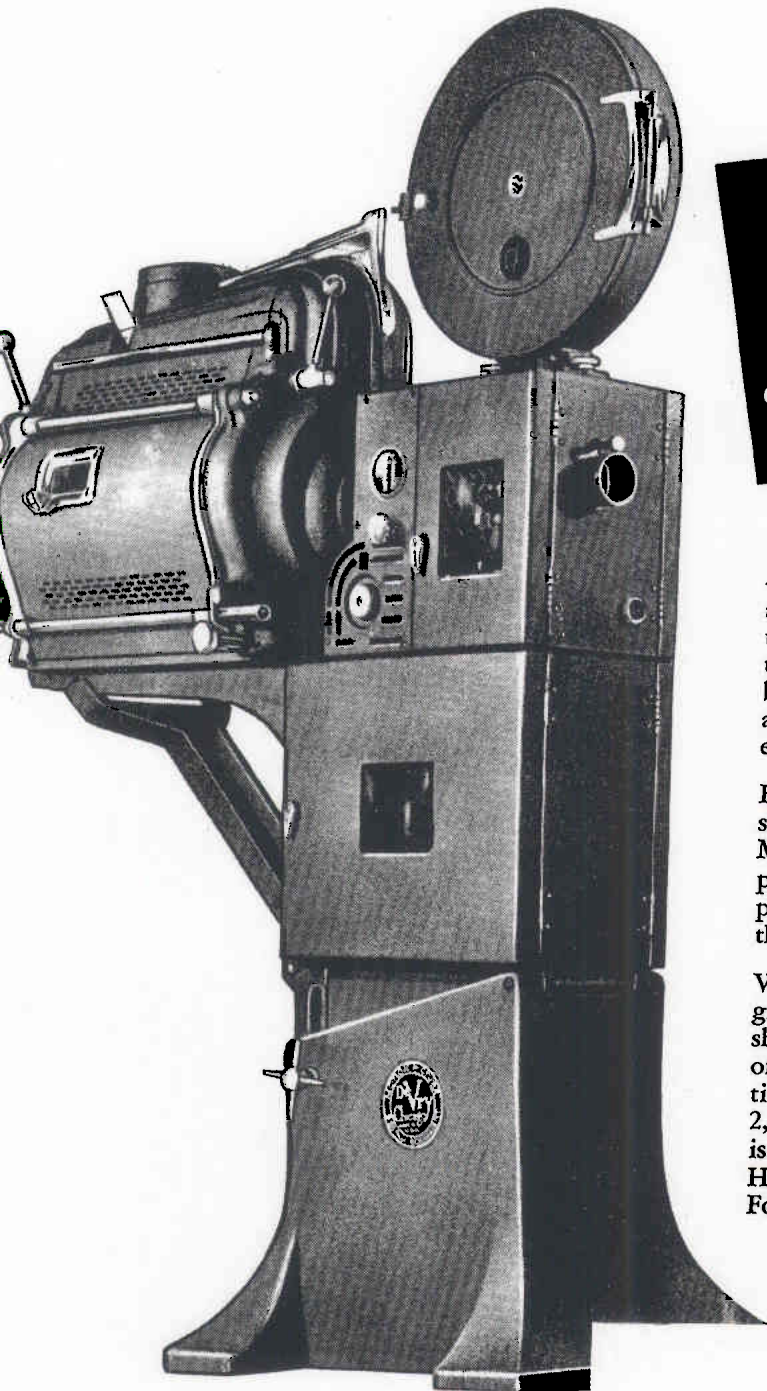

STAR CINEMA SUPPLY COMPANY

621 WEST 55TH STREET

**A Limited Quantity
— While They Last**

Special Offer!

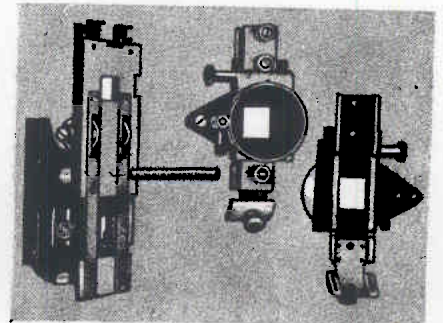

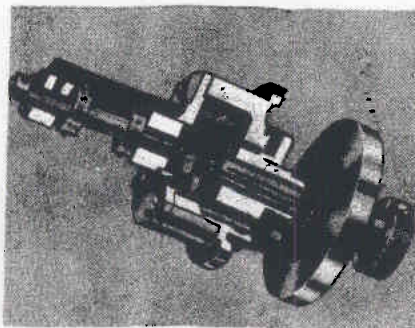

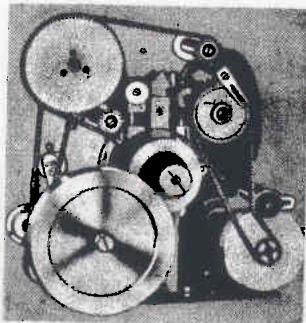

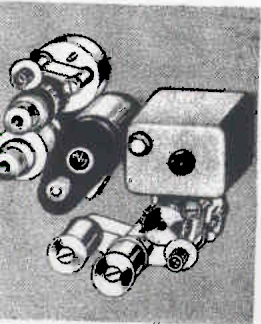

**MODEL 10
DeVry THEATRE
PROJECTOR**

MANY owners of small theatres must limit the amount of money they put into new projectors and sound systems. However, no matter how small the theatre or how limited its budget, it cannot afford to give its patrons less than top-flight presentation of both pictures and sound. If you've been shopping around for dependable projection equipment at lowest expense, go no farther, here it is!

Fundamentally the Model "10" includes all of the same fine operating features as the famed DeVry Model "12000." The projection head includes both picture head and sound head in one compact complete unit, a modern design advantage that means the utmost in both visual and sound presentations.

Vital parts of the intermittent are of hardened steel ground to micrometric accuracy, as are the pressure shoes, film parts and sprockets. The projector base is of rugged construction, rigid and strong for vibrationless results. Magazines are of heavy gauge steel, 2,000-ft. capacity. The arc lamp mounting support is adjustable to accommodate every type of lamp. Hum-free direct current for exciter lamp operation. For a wise investment, the Model "10" is a wise buy.

Built-in Ultra Precision

REBUILT LIKE NEW

PURCHASED FROM THE UNITED STATES GOVERNMENT AND REBUILT AT THE FACTORY. GUARANTEED IN A CONDITION COMPARABLE TO NEW. EACH OUTFIT IS COMPLETE, EQUIPPED FOR CINEMASCOPE, READY TO SET UP AND OPERATE AND CONSISTS OF THE FOLLOWING:

- 2 - DeVry Projectors with self-contained soundheads.
 - 2 - Electric changeovers and footswitches.
 - 2 - 3000' upper magazines.
 - 2 - Heavy duty box type pedestals with tilting devices.
 - 2 - Lenses, Series II coated, focus as required.
 - 2 - 30 ampere low intensity lamphouses, rebuilt, with 10 1/4" reflectors.
 - 2 - Rectifiers for above, with new tubes.
 - 1 - 30 watt amplifier and monitor speaker.
 - 2 - Heavy duty 12" PM speakers in cases, with cables.
- ALL FOR THE SUM OF.....\$1125.00

IF ABOVE EQUIPMENT IS DESIRED WITH SUPREX HIGH INTENSITY LAMPHOUSES AND RECTIFIERS, INSTEAD OF LOW INTENSITY, THE PRICE IS.....\$1575.00

IF TWO WAY SPEAKER SYSTEM IS PREFERRED, THE ADDITIONAL PRICE IS \$195.00.

IF DC EXCITER LAMPS SUPPLY IS DESIRED, THE ADDITIONAL PRICE, FOR TWO (2) PROJECTORS, IS \$49.50.

PICTURE MECHANISM . . . a marvel of mechanical excellence. The intermittent movement, the "heart" of the projector is built to an accuracy of 1/10,000th inch and is perfectly synchronized with the efficient DeVry shutter mechanism. All sprockets are reversible, accurately machined and hardened. The sprocket idlers hold the film snugly and safely in place on the sprocket. The film gate is removable as a unit and provides correct, equalized tension on the film in the gate for rock-steady projection. The aperture plate has a series of cooling baffles to protect the film from damage due to excessive heat.

BUILT-IN SOUND HEAD . . . truly an electronic masterpiece, combining the exciter lamp, photoelectric cell and sound optical lens in such an efficient manner that the sound is picked-up direct from the film—no mirrors or prisms to cause distortion due to dirty reflecting optical faces. Efficiently designed filtering system maintains constant film speed at point of scanning. The sound head is not added to the mechanism, but is incorporated as an integral part of the projector—assuring perfect synchronization with the picture mechanism.

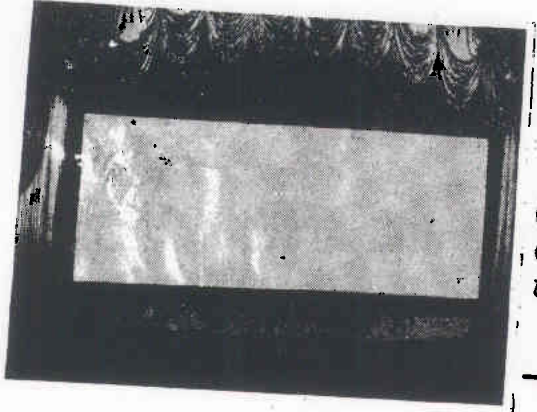

SILENT CHAIN DRIVE . . . exclusive with DeVry, provides velvet smooth, shock-proof noiseless power transmission. The ease, convenience and flexibility afforded by the silent chain drive in servicing has made this new DeVry one of the favorite choices of professional projectionists.

 used with brush or spray. YOUR COST—\$7.85 per gal.

PROJECTION LENSES

WOLLENSAK

Finest Lenses
 Are Needed for
 New Projection
 Techniques...

● All Cinema Raptar Projection Lenses are ideally
 suited for use with Anamorphic Lenses.

The six-element construction, rather than the four-element
 type, was used because CinemaScope requires the finest in a
 projection lens system. Cinema Raptar Projection Lenses are
 the only lenses currently available using six elements in focal
 lengths longer than 5" in 2²⁵/₃₂" tube diameter.

The 3¹/₂" to 7¹/₂" focal length Cinema Raptars are supplied
 in 2²⁵/₃₂" tube diameters, complete with shade tube and ana-
 morphic lens adapter.

2" TO 3 1/4" INCL. PER PAIR \$162.50
 3 1/2" AND 3 3/4" PER PAIR \$172.50
 4" THROUGH 5 1/2" PER PAIR

**THE
NEW
f 1.8**

300

The unprecedented speed of f/1.8 assures maximum light transmission... No additional power consumption for this extra brightness. All glass air surfaces are hard coated for greater light output and contrast.

HILUX LENSES

Made by Projection Optics Co.
Rochester, N. Y.

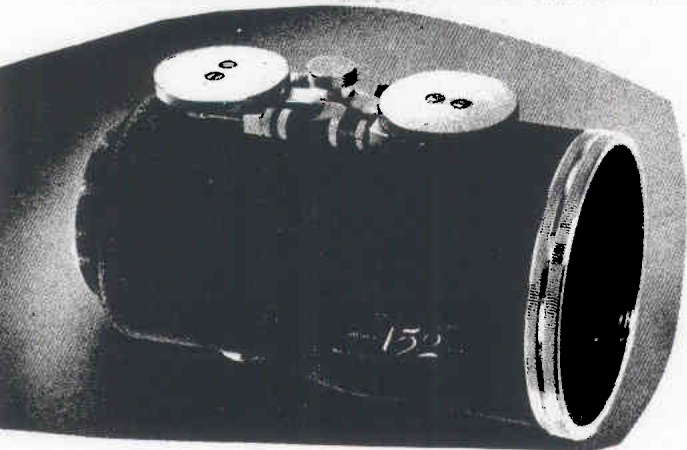

Hilux Objective Lenses fill your screen with a brighter, clearer picture. Designed as a primary lens for every wide-screen system used today... a true anastigmat lens. They're absolutely your best buy for maximum light transmission, razor-edge definition.

A hermetically sealed mount assures you of clean optics at all times. All-aluminum one-piece body, fully anodized and treated to reduce reflection and insure life of lens.

2.00", 2.25", 2.50" AND 2.75".....PER PAIR.....\$195.00
3.00", 3.25" AND 3.50".....PER PAIR.....\$217.50

HILUX 152

Variable 1.5X to 2.0X for all 2²⁵/₃₂" standard Projection Lenses.

425.
217.
64 millimeter free rear aperture assuring maximum non-vignetting light transmission.

Threaded to fit all 36 thread Standard Projection Lenses.
No Support Brackets required.

YOUR COST.....PER PAIR.....\$345.00
SPECIAL! PACKAGE DEAL - PAIR 152 LENSES AND A PAIR OF SUPERLITE III-C.....\$425.00

ULTRA PANATAR

- The only variable anamorphic lens with which the picture remains centered when the ratio is changed—requiring no adjustments, and using only a single control knob. Ratios can be changed while picture is being projected—to obtain dramatic effects.
- Gives top image quality with no double focusing—individual correctors remove all astigmatism.
- When mounted to prime lens it forms an optical train that is completely sealed against dust and dirt.

ORDERING, SPECIFY PROJECTION DISTANCE.. YOUR COST.. PER PAIR.. \$365.00

NEW

A 15 ampere SIL-TUBE for all Gas-Filled Tube Rectifiers

- 97 to 98% Efficient
- Virtually Unlimited Life
- Sealed against Moisture
- Non-aging
- No Filaments to "snarl", "sag" or "snap"
- No more burned Socket Contacts
- Convection Cooled, no Fan Required
- Lower Transformer Temperatures
- Sold on a 4-year pro-rated guarantee

THE R-1160 SIL-TUBES
ARE USED IN THE SUP-
REX HIGH INTENSITY
TYPE RECTIFIERS, USING
4 OR MORE TUBES IN
EACH RECTIFIER.

A TREMENDOUS SAVINGS!
INCREASED EFFICIENCY!
PROVEN DEPENDABLE!

OUR PRICE IS THE LOW-
EST IN THE INDUSTRY.

YOUR COST.....\$15.95

The R-1160 SIL-TUBE can be used on all arcs that operate up to 45 Volts—the R-1170 SIL-TUBE on all arcs in excess of 45 Volts.

EASY TO INSTALL: Simply remove the gas-filled tubes and screw SIL-TUBES into the same sockets. Connect anode leads. Reduce the output voltage of the rectifier by moving the voltage taps and rotary tap switch back. This compensates for the tremendous gain in efficiency of silicon over gas-filled tubes and represents your power savings.

"BEST" AUTOMATIC SLIDE PROJECTOR

An ideal slide projector for continuous operation, comes in three sizes, 500, 1000 and 1500 watt. May be used in projection booth, in lobby or on roof with outdoor screen. Powered by heavy duty motor and completely foolproof. 500 watt model accommodates ten slides—1000 and 1500 watt models, twelve slides.

"BEST" 1500 WATT SLIDE PROJECTOR

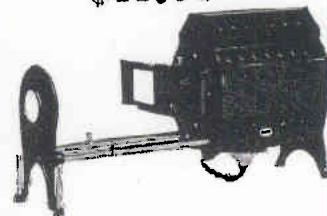

A high powered, hand-operated slide projector. Delivers twice as much light as a 1000 watt projector and is for use on exceptionally long throws or where an exceptional amount of screen illumination is needed. All "Best" Slide Projectors come complete with mirror, heavy-duty cord and switch. In addition, the 1500 watt models are equipped with Heat Absorbing Glass as a protection to the slides.

500 WATT BESTEREOPTICON

The ideal projector for the small theatre, classroom, lecturer, church, and photographer. High efficiency and low price make the 500 watt Bestereopticon unusually popular for distances up to 75 feet. A trial will convince you that this projector delivers screen results that are equal to those of much higher priced projectors. Leatherette Carrying Case available.

"BEST" 1000 WATT SLIDE PROJECTOR
\$44.95

A projector for general use that has found a place in theatres using high intensity lamps for their film projectors, and especially where the distance to the screen exceeds 75 feet. Lamp and mirror adjustments on ALL "Best" Slide Projectors are on the OUTSIDE where they are cool and easy to get at. Leatherette Carrying Case available.

Price of 500 watt Automatic slide projector...\$62.50; 1000 watt...\$94.50
1500 watt model...\$117.50; All prices include bulb. Projectors are equipped with lamp cord, switch, slide carrier, lenses, etc. Any focus lens from 6" to 36" can be furnished.

Buy\$149.50

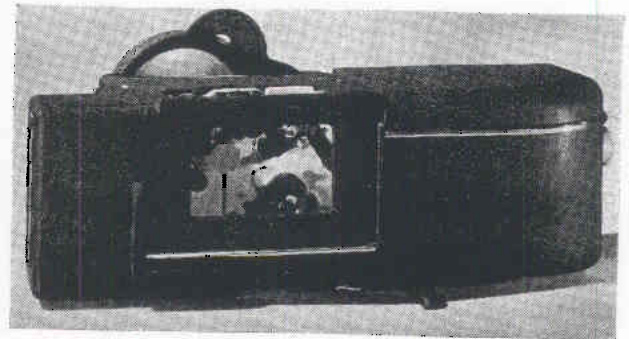

SOUND EQUIPMENT

In the STAR rebuilding process, the soundhead is stripped to the bare chassis, most parts are replaced with brand new parts and the remaining pieces are nicked. The machines are then run in for at least 24 hours, and finally tested under actual operation.
GUARANTEE - Each STAR reconstructed soundhead is fully guaranteed for at least one year against defects in material or workmanship.

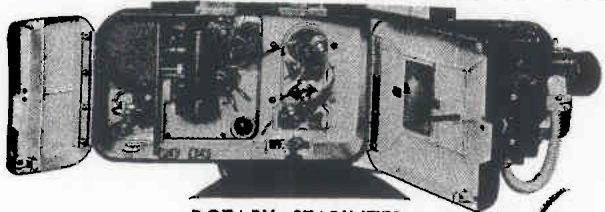

RCA's Famous Rotary Stabilizer Soundhead

RCA's famous Rotary Stabilizer largely accounts for the superlative reproduction typical of RCA Theatre Sound Systems. With it, film flows smoothly and steadily past the light source—no flutter or speed variation to mar the perfect illusion of living sound.

In this, the finest of soundheads, RCA technicians have also incorporated: action pad rollers and large film strippers to prevent film damage; oil collection and drainage system between projector and soundhead; in socket prefocus exciter lamp holder; extra-roomy, white painted interior to facilitate threading and cleaning.

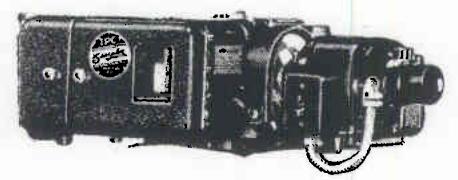

MI-9030 AND MI-9050 - Considered the best! Factory selling price over \$2800 pair!
 Our price, per pair, Completely rebuilt and refinished, like new, with drive attachments, etc., ready to set up and operate..... \$ 595.00
