Equipment Mounting in Theatre Installations

☐ Modification Urgent
☐ Modification Recommended
☐ Modification Required on Early Units
☐ Modification if Problem is Present
☒ Information Bulletin

Dolby cinema processors are built to the highest standards, including the latest European CE norms. Various types of noise may be present in and around the projection booth without any audible signs of its presence. Proper mounting and wiring of cinema processors and other booth equipment helps ensure trouble-free performance.

Equipment Mounting

We recommend that Star washers be installed on all rack mounting screws to ensure good ground contact. This will aid in the prevention of electrical noise problems.

Connections

Proper shielding and termination of cables and cable assemblies is also very important. Be sure to follow the methods shown in the Cinema Processor installation manual wiring diagrams.
